

### ABSTRACT

5 A method for using one or more inflatable three-dimensional humanoid figures  
for use in background scenes associated with still photography, motion pictures  
and video productions which are low in cost, lightweight, easy to use, easy to  
store, easy to transport and provides a greater range of viewing angles. It is also  
envisioned that this invention can be used for corporate conventions requiring the  
illusion of a large number of participants, in advertising and other functions where  
the illusion of large numbers of people enhance the overall objective of the  
10 functions.
